The Following symbols are a small sample of the different choices you have when you choose to sandblast with us. These intricate symbols can be used in your sandblast artwork as small as 3" and as large as you can fit on the monument! We're excited to help you create your wonderful sandblasted memorial.
When deciding which cut depth and color to choose, consider the following:

**Frosted panels look better** and tend to stand out more with V-cut lettering and any lettering inside panels look best black litho.

**Lettering without panels looks best** with more shallow Sandblasting depths, as with Dish and Skin cuts (this reduces the amount of shadow on the letters from the bright sun rays).

**Skin cuts are generally a better idea** when sandblasting the top of granite benches and chairs, as the shallow depth of the Skin cut does not pool with water (and in winter freeze and crack).

**When using highly ornate fonts** such as Old English, Commercial Script, etc., it’s generally easier to use smaller sizes with Dish or Skin cuts.

When choosing a lettering color without panels consider:

**SD Pink, Paradise Green and any black granite lettering looks best with Highlight, Sawsheen or White.**

**Lettering on Cloud Gray looks best with White** (does not look good with black lettering).**

**Lettering on Carnation Pink and Super Gray looks great with Black, White, Sawsheen, or Highlight.**

**Lettering on Chestnut Red looks great with a Sawsheen finish** (does not look good with black or white finish).

If you’re ever unsure of what cut depth or color to choose, be sure to consult one of our experts at 1-800-449-2481.

**OUTLINED LETTERING**

We do both frosted outline lettering and polished outline lettering. This style of lettering looks particularly great for family names. If you are looking to use this style for names, dates, and/or epitaphs please call one of our sandblast experts today 1-800-449-2481.
